OLGA FOMIN

FRONT-END WEB DEVELOPER

Objective

My goal is to become a part of the collaborative and creative web development team and use my skills to build software with a focus on great user experience, performance, and efficiency.

Project Experience

REACT APP: <https://optio-evergreen.herokuapp.com>

- Worked in a team of 2 to create a full-stack application that allows users to create polls that their friends can vote on
- Participated in daily standups and weekly sprint plannings
- Was the main contributor to the front-end of the application
- Implemented user authentication using JWT, Material UI styling, login/signup forms, Redux, real-time voting with socket.io

WEBSITE REDESIGN: <https://californiabirds.org>

- Collaborated with the team of 4 UI/UX designers and 3 developers to bring a completely new look to the existing website
- Promoted and communicated new ideas to the team and the client
- Redesigned the following pages: database query results, annual reports, lists, rare bird gallery, therefore, providing better user experience and responsive design

WORDPRESS BLOG: <https://estercooks.com/>

- Translated client's ideas into mockups and wireframes
- Customized a Wordpress template to meet the client's needs
- Ensured excellent performance across multiple browsers and devices
- Maintained the website, working on new features (in progress)
